3-Point Linkage to fit 'Workman HD' and 'ProGator'

The independently operated 3-Point Linkage kit has been designed to suit all category 1 implements.

Up to 400 kg lift capacity, the frame can be attached or removed in a matter of minutes, as and when required. The drop arms are fully adaptable for balance and height adjustment. The lift and lower mechanism is operated by the existing bed lift lever.

Specifications:

Width: 94.5 cm
Height: 53 cm
Weight: 85 kg
Lift capacity: 400 kg
Drop arms: fully adjustable
Operation: dual hydraulic rams

John Deere 'ProGator'/Kubota 'RTV900' PTO Kit

This kit converts the existing hydraulic flow PTO to a 540/1000 rpm 6-spline output type and enables the use of standard implements that require mechanical drive operation. The PTO Kit is delivered fully assembled for easy installation.
